# UNITED STATES SECURITIES AND EXCHANGE COMMISSION Washington, D. C. 20549

FORM 8-K

CURRENT REPORT Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (Date of earliest event reported) October 11, 2002

MGP Ingredients, Inc. (Exact name of registrant as specified in its charter)

KANSAS0-1719648-0531200(State or other jurisdiction of<br/>incorporation)(Commission<br/>File Number)(IRS Employer Identification No.)

1300 Main Street Box 130 Atchison, Kansas 66002 (Address of principal executive offices) (Zip Code)

(913) 367-1480 (Registrant's telephone number, including area code)

Item 7. Exhibits

99.1 Press Release dated October 11, 2002. 99.2 Press Release dated October 11, 2002.

Item 9. Regulation FD Disclosure.

Attached as Exhibits 99.1 and 99.2 and incorporated into this Item 9 by reference are two press releases which were issued on October 11, 2002 by MGP Ingredients, Inc.

# SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

MGP INGREDIENTS, INC.

Date: October 11, 2002 By:/s/ Brian T. Cahill Brian T. Cahill Vice President and Chief Financial Officer

# FOR IMMEDIATE RELEASE: MGP STOCKHOLDERS RE-ELECT HAVERTY, SEABERG, SCHRICK TO BOARD

ATCHISON, Kan., October 11, 2002--Michael R. Haverty, chairman, president and chief executive officer of Kansas City Southern, was re-elected to the Board of Directors of MGP Ingredients, Inc. (MGPI/Nasdaq) yesterday by holders of the company's common stock. Ladd M. Seaberg, president and chief executive officer of MGP Ingredients, and Randall M. Schrick, vice president of manufacturing and engineering, were re-elected to the board by holders of the company's preferred stock. The terms of all three expire in 2005.

Results of the elections were announced at the company's annual meeting of stockholders yesterday in Atchison. The elections were the only items on this year's ballots.

Haverty has been a member of the company's board since October, 1999. He currently serves as chairman of the board's nominating committee and is a member of its audit review and human resources committees. He has served in his present capacity at Kansas City Southern since January, 2001, and previously spent six years as that company's executive vice president. Haverty has also served as president and chief executive officer of The Kansas City Southern Railway Company, a subsidiary of Kansas City Southern, since 1995.

Seaberg, who was first elected to the board of MGP Ingredients in 1979, has served as the company's president since 1980 and as chief executive officer since 1988. He began his career with the company in 1969 and has been an officer since 1970.

Schrick became a director in 1987 and has been with the company since 1973. He was named vice president of manufacturing and engineering this past May, prior to which he served for ten years as vice president of operations and eight years as vice president and general manager of the company's plant in Pekin, Ill.

Formerly Midwest Grain Products, Inc., the company's name was officially changed to MGP Ingredients, Inc. yesterday. The new name was adopted to reflect the company's greatly increased focus on supplying ingredient solutions to the marketplace. The company produces an array of specialty and commodity proteins and starches, along with food grade and fuel grade alcohol and alcohol by-products.

#### FOR IMMEDIATE RELEASE

### MGP INGREDIENTS ANNOUNCES TIMETABLE FOR RESUMING DISTILLERY OPERATIONS AT ATCHISON PLANT

ATCHISON, Kan., October 11, 2002--MGP Ingredients, Inc., (MGPI/Nasdaq) has announced that it is proceeding with plans to restart alcohol production at its Atchison, Kan., plant, where an explosion on Sept. 13 caused significant damage to the company's distillery operations. "While we expect that it will take from nine months to a year to complete the total rebuilding process, we anticipate that we could resume some alcohol production at the plant within two months," said Ladd Seaberg, president and chief executive officer.

Although a full damage assessment is still being completed, the company has made a preliminary determination of equipment replacement needs and initiated an engineering study, according to Seaberg. Noting that no firm estimates have yet been made, Seaberg stated that "we believe our insurance will be sufficient to substantially offset rebuilding costs, as well as business interruption costs."

Historically, the Atchison distillery has produced approximately one-third of the company's total alcohol output. During the time the distillery remains inoperable, the company believes that production capabilities at its Pekin, Ill., facility should be adequate to supply regular customers. However, the company's ability to supply spot business at this time is substantially reduced. During the past fiscal year, the Atchison distillery produced nearly 60 million proof gallons of alcohol. That amount accounted for approximately 19 percent of the company's total fuel grade alcohol production and approximately 67 percent of its total food grade alcohol production.

Because the Atchison plant's wheat-based ingredient and alcohol production processes are integrated, the distillery shutdown has interfered with the company's ability to produce the base raw material for specialty ingredients at this location. "Fortunately," Seaberg said, "our Illinois operation has been able to produce the base proteins and starches, which are then transferred to the Atchison facility as raw material for producing our specialty products."

Seaberg stated that despite current obstacles, the company has not altered its plans to grow its specialty wheat-based ingredient sales in fiscal 2003 above the \$37.4 million in sales that were realized in fiscal 2002.

"We are more determined than ever to achieve our objectives and to secure a bright and successful future for the company and those we serve," Seaberg said. "While the incident on September 13 has partially disabled our Atchison operations, our people have rallied in a tremendous way and are putting forth great effort to overcome this temporary setback."

# ADD1--MGP INGREDIENTS ANNOUNCES TIMETABLE

Seaberg reported that conditions at the Atchison plant have forced the temporary layoff of 41 of the facility's 300 employees at this time. "We are doing everything we can to minimize the impact of this situation on our workforce," he said. "It is our hope to provide jobs for as many affected employees as possible just as quickly as conditions allow."

Seaberg praised employees for their "patience and extraordinary performance during this difficult period." He said that "while the distillery mishap has thrown a number of challenges our way, it has motivated us to become more innovative in our approach to fulfilling our customers' needs."

The explosion occurred when alcohol vapors in the plant's stillhouse apparently ignited. The source of the ignition, however, has not yet been determined. "Thankfully, the effects of the explosion were not more severe," Seaberg said. "Above all, we are fortunate and extremely grateful that the blast did not result in any life-threatening injuries." One employee, training coordinator Fred Gage, was briefly hospitalized for burns. He recently returned to his job after recuperating for a period at his home.

Formerly known as Midwest Grain Products, Inc., the business was renamed MGP Ingredients, Inc. yesterday at the close of the 61-year-old company's annual meeting of stockholders. The name change was approved by holders of the company's preferred stock on Aug. 27 and was made to more accurately reflect a greatly increased focus on the development, production and marketing of specialty ingredients derived from natural sources.

This news release contains forward-looking statements as well as historical information. Forward-looking statements are identified by or are associated with such words as "intend," "believe," "estimate," "expect," "anticipate," "hopeful," "should," "may" and similar expressions. They reflect management's current beliefs and estimates of future economic circumstances, industry conditions, company performance and financial results and are not guarantees of future performance. The forward-looking statements are based on many assumptions

and factors, including those relating to grain prices, gasoline prices, energy costs, product pricing, competitive environment and related marketing conditions, operating efficiencies, access to capital and actions of governments or government officials. Any changes in the assumptions or factors could produce materially different results than those predicted and could impact stock values.
